

The Honorable Tana Lin

UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF WASHINGTON
AT SEATTLE

KATHLEEN MORIARTY,

Plaintiff,

v.

PORT OF SEATTLE,

Defendant.

CASE NO. 2:23-cv-1209-TL

RULE 29 STIPULATION REGARDING
DISCOVERY OF ELECTRONICALLY
STORED INFORMATION AND
~~PROPOSED~~ ORDER

The parties hereby stipulate to the following provisions regarding the discovery of electronically stored information (“ESI”) in this matter:

A. General Principles

1. An attorney’s zealous representation of a client is not compromised by conducting discovery in a cooperative manner. The failure of counsel or the parties to litigation to cooperate in facilitating and reasonably limiting discovery requests and responses raises litigation costs and contributes to the risk of sanctions.

2. As provided in LCR 26(f), the proportionality standard set forth in Fed. R. Civ. P. 26(b)(1) must be applied in each case when formulating a discovery plan. To further the application of the proportionality standard in discovery, requests for production of ESI and related responses should be reasonably targeted, clear, and as specific as possible.

RULE 29 STIPULATION REGARDING DISCOVERY OF
ELECTRONICALLY STORED INFORMATION AND
~~PROPOSED~~ ORDER

SUMMIT LAW GROUP, PLLC
315 FIFTH AVENUE SOUTH, SUITE 1000
SEATTLE, WASHINGTON 98104-2682

Fax: (206) 676-7001

B. ESI Disclosures

Within 30 days of entry of this Order, or at a later time if agreed to by the parties, each party shall disclose:

1. Custodians. The five custodians most likely to have discoverable ESI in their possession, custody, or control. The custodians shall be identified by name, title, connection to the instant litigation, and the type of the information under the custodian's control.

2. Non-custodial Data Sources. A list of non-custodial data sources (e.g., shared drives, servers), if any, likely to contain discoverable ESI.

3. Third-Party Data Sources. A list of third-party data sources, if any, likely to contain discoverable ESI (e.g., third-party email providers, mobile device providers, cloud storage) and, for each such source, the extent to which a party is (or is not) able to preserve information stored in the third-party data source.

4. Inaccessible Data. A list of data sources, if any, likely to contain discoverable ESI (by type, date, custodian, electronic system or other criteria sufficient to specifically identify the data source) that a party asserts is not reasonably accessible under Fed. R. Civ. P. 26(b)(2)(B).

C. ESI Discovery Procedures

1. On-site inspection of electronic media. Such an inspection shall not be required absent a demonstration by the requesting party of specific need and good cause or by agreement of the parties.

2. Search methodology. The parties shall timely confer to attempt to reach agreement on appropriate search terms and queries, file type and date restrictions, data sources (including custodians), and other appropriate computer- or technology-aided methodologies, before any such effort is undertaken. The parties shall continue to cooperate in revising the appropriateness of the search methodology.

a. Prior to running searches:

i. The producing party shall disclose the data sources (including

1 custodians), search terms and queries, any file type and date restrictions, and any other
 2 methodology that it proposes to use to locate ESI likely to contain responsive and discoverable
 3 information. The producing party may provide unique hit counts for each search query.

4 ii. The requesting party is entitled to, within 14 days of the producing
 5 party's disclosure, add no more than 10 search terms or queries to those disclosed by the
 6 producing party absent a showing of good cause or agreement of the parties.

7 iii. The following provisions apply to search terms / queries of the
 8 requesting party. Focused terms and queries should be employed; broad terms or queries, such as
 9 product and company names, generally should be avoided. A conjunctive combination of
 10 multiple words or phrases (*e.g.*, "computer" and "system") narrows the search and shall count as a
 11 single search term. A disjunctive combination of multiple words or phrases (*e.g.*, "computer" or
 12 "system") broadens the search, and thus each word or phrase shall count as a separate search term
 13 unless they are variants of the same word. The producing party may identify each search term or
 14 query returning overbroad results demonstrating the overbroad results and a counter proposal
 15 correcting the overbroad search or query.

16 A search that returns more than 400 unique documents, excluding families, is presumed to be
 17 overbroad.

18 b. After production: Within 21 days of the producing party notifying the
 19 receiving party that it has substantially completed the production of documents responsive to a
 20 request, the responding party may request no more than 10 additional search terms or queries.
 21 The immediately preceding section (Section C(2)(a)(iii)) applies.

22 c.

23 3. Format.

24 a. To the best effort of the supplying party, ESI will be produced to the
 25 requesting party with searchable text, in a format to be decided between the parties. Acceptable
 26 formats include, but are not limited to, native files, multi-page TIFFs (with a companion OCR or

1 extracted text file), single-page TIFFs (only with load files for e-discovery software that includes
 2 metadata fields identifying natural document breaks and also includes companion OCR and/or
 3 extracted text files), and searchable PDF.

4 b. Unless otherwise agreed to by the parties, files that are not easily converted to
 5 image format, such as spreadsheet, database, and drawing files, will be produced in native
 6 format.

7 c. Each document image file shall be named with a unique number (Bates
 8 Number). File names should not be more than twenty characters long or contain spaces. When a
 9 text-searchable image file is produced, the producing party must preserve the integrity of the
 10 underlying ESI, *i.e.*, the original formatting, the metadata (as noted below) and, where applicable, the
 11 revision history.

12 d. If a document is more than one page, the unitization of the document and any
 13 attachments and/or affixed notes shall be maintained as they existed in the original document.

14
 15 4. De-duplication. The parties may de-duplicate their ESI production across custodial and
 16 non-custodial data sources after disclosure to the requesting party, and the duplicate custodian
 17 information removed during the de-duplication process tracked in a duplicate/other custodian
 18 field in the database load file.

19 5. Email Threading. The parties may use analytics technology to identify email
 20 threads and need only produce the unique most inclusive copy and related family members and
 21 may exclude lesser inclusive copies. Upon reasonable request, the producing party will produce a
 22 less inclusive copy.

23 6. Metadata fields. If the requesting party seeks metadata, the parties agree that only the
 24 following metadata fields need be produced, and only to the extent it is reasonably accessible and
 25 non-privileged: document type; custodian and duplicate custodians (or storage location if no
 26 custodian); author/from; recipient/to, cc and bcc; title/subject; email subject; file name; file size; file

extension; original file path; date and time created, sent, modified and/or received; and hash value.

The list of metadata type is intended to be flexible and may be changed by agreement of the parties, particularly in light of advances and changes in technology, vendor, and business practices.

7.

D. Preservation of ESI

The parties acknowledge that they have a common law obligation, as expressed in Fed. R. Civ. P. 37(e), to take reasonable and proportional steps to preserve discoverable information in the party's possession, custody, or control. With respect to preservation of ESI, the parties agree as follows:

1. Absent a showing of good cause by the requesting party, the parties shall not be required to modify the procedures used by them in the ordinary course of business to back-up and archive data; provided, however, that the parties shall preserve all discoverable ESI in their possession, custody, or control.

2. The parties will supplement their disclosures in accordance with Fed. R. Civ. P. 26(e) with discoverable ESI responsive to a particular discovery request or mandatory disclosure where that data is created after a disclosure or response is made (unless excluded under Sections (D)(3) or (E)(1)-(2)).

3. Absent a showing of good cause by the requesting party, the following categories of ESI need not be preserved:

- a. Deleted, slack, fragmented, or other data only accessible by forensics.
- b. Random access memory (RAM), temporary files, or other ephemeral data that are difficult to preserve without disabling the operating system.
- c. On-line access data such as temporary internet files, history, cache, cookies, and the like.

1 d. Data in metadata fields that are frequently updated automatically, such as last-
2 opened dates (see also Section (E)(5)).

3 e. Back-up data that are duplicative of data that are more accessible elsewhere.

4 f. Server, system or network logs.

5 g. Data remaining from systems no longer in use that is unintelligible on the
6 systems in use.

7
8 h. Electronic data (*e.g.*, email, calendars, contact data, and notes) sent to or
9 from mobile devices (*e.g.*, iPhone, iPad, Android devices), provided that a copy of all such
10 electronic data is automatically saved in real time elsewhere (such as on a server, laptop, desktop
11 computer, or “cloud” storage).

12 **E. Privilege**

13 1. A producing party shall create a privilege log of all documents fully withheld from
14 production on the basis of a privilege or protection, unless otherwise agreed or excepted by this
15 Agreement and Order. Privilege logs shall include a unique identification number for each
16 document and the basis for the claim (attorney-client privileged or work-product protection). For
17 ESI, the privilege log may be generated using available metadata, including author/recipient or
18 to/from/cc/bcc names; the subject matter or title; and date created. Should the available metadata
19 provide insufficient information for the purpose of evaluating the privilege claim asserted, the
20 producing party shall include such additional information as required by the Federal Rules of
21 Civil Procedure. Privilege logs will be produced to all other parties no later than 30 days before the
22 deadline for filing motions related to discovery] unless an earlier deadline is agreed to by the parties.

23 2. Redactions need not be logged so long as the basis for the redaction is clear on the
24 redacted document.

25 3. With respect to privileged or work-product information generated after the filing of
26 the complaint, parties are not required to include any such information in privilege logs.
